

Uninsured Services

The Ontario Health Insurance Plan (OHIP) provides coverage for a vast majority of diagnostic services when medically necessary; however, there are some services that are not covered.

Fenelon Falls Diagnostic Imaging is pleased to offer these valuable diagnostic services, however; the responsibility for payment lies with the patient or the third party requesting the service.

Uninsured services and applicable fees are as follows:

Chest X-ray for Immigration or Non-medical (Referral require): X090 \$50.00

Sinus X-ray (Referral require): X008 \$50.00

Invalid/Expired Health Card (per visit) (Referral require): \$ depends on the type of visit

Payment is expected before you receive the service.

You will be required to sign a consent form if you are having any of the listed uninsured examinations, indicating that you agree to pay the applicable fee and that you give us permission to proceed with the examination.

The Ministry of Health's Protecting Access to Public Healthcare Program can be reached by phone at 1-888-662-6613 or by email at protectingpublichealthcare@ontario.ca if you have any inquiries or concerns about the uninsured fees.
